

SECOND ANNOUNCEMENT OF THE 3RD DUTCH OFFSHORE WIND CONFERENCE

BALANCING KNOWLEDGE AND EXPERIENCE

25 & 26 NOVEMBER 2010 | IJMUIDEN, THE NETHERLANDS

VENUE: HOLIDAY INN IJMUIDEN SEAPORT BEACH

We@Sea in close cooperation with NWEA, ATO are happy to announce the 3rd Dutch Offshore Wind Conference.

To build and operate offshore wind farms is a new and challenging multi disciplinary business. Many Dutch companies are involved in the offshore wind activities in the North Sea.

They are learning by doing. In addition, researchers and consultancies are learning from the practical information and experience in construction and operation of the current offshore wind farms.

The aim of this conference is to give these companies and researchers the opportunity to present their experiences (no advertising) and their vision on the offshore wind energy developments. We will offer you an innovative and attractive conference programme which will reflect the dynamic and forward-thinking of the companies and the connected research world.

Go to www.we-at-sea.org for the programme and the registration form. For contributions or questions, please contact us by email: westra@ecn.nl

We look forward to meeting you in November!

Chris Westra | Jos Beurskens | www.we-at-sea.org
